Log your sustainablity efforts

It is quick and easy to enter key information through the app each time the net is emptied and maintenance operations are conducted.
The app automatically retrieves weather data, wind and rain.

Manage your data

The marina manager monitors collection statistics throughout the year and can access charts, collection history, and raw data for reporting.

Communicate

A user friendly tool designed to highlight the marina's commitment to Ocean protection and sustainability actions. Data ready to be integrated into any extra financial reports.
